Join Land O'Lakes, and you join boundless thinkers and doers from all walks of life working together to feed the world. Take pride in working with some of America's favorite brands, including Purina Animal Nutrition, WinField United, Vermont Creamery and KozyShack, and more. You'll be joining a team committed to everything from the seeds that go into the ground, to the technology that improves crop yields and sustainability, to the grain that animals eat to produce milk, to marketing the final product, like our many legendary products. We're looking for audacious optimists and innovative thinkers to help us meet food's toughest challenges.

These roles are at our Dairy Foods manufacturing facility for Land O'Lakes, creating dairy products that stand for real, simple goodness. We believe there's power in every drop of milk our farmers produce, and by improving production and finding innovative uses for that milk, we add a little good to people's lives.

The **Maintenance Controls Technician** is responsible for the installation, maintenance, and repair in support of the facility and production equipment. In this role, the technician will work with a variety of mechanical, electrical, pneumatic, and hydraulic systems and controls. Superior logical-thinking and troubleshooting skills are critical. This position is critical to the safe and efficient operation of the facility. The position objective is to perform tasks intended for maximizing asset reliability, availability, and maximum efficiency. Primary objectives shall be to perform tasks safely, while following all company and plant rules and policies to ensure the work environment is safe for all employees as well as clean and compliant equipment and systems for safe and wholesome production of all products. The Maintenance Controls Technician will be responsible for troubleshooting, repair, testing, maintaining, calibrating and proper operation of all instrumentation, control systems, electrical support systems and equipment at the facility.
