

If you are looking for an innovative company to start your career or to further your career, consider Kaysun Corporation. Our vision is for Kaysun to become the number one provider of highly engineered injection molded products and value added services and we are interested in highly motivated, talented individuals who embrace our values and are committed to contributing to a positive, growing company.

We offer a comprehensive benefit plan that includes health, dental, vision, disability, life, and voluntary life insurance as well as section 124 flexible spending plans. We offer a 401k plan to all employees and pride ourselves in our state-of-the-art facility that includes a fitness center as one of the many ways we actively promote workplace wellness. We also offer 75% fitness club membership reimbursement benefits.

With over 60 years of experience and expertise, Kaysun has grown from three people to hundreds of employees and has a state-of-the-art headquarters in Manitowoc, Wisconsin. We are very proud of how far we have come and seek to continue our growth through the dedication, talent, and hard work of our employees.

We are the go-to partner for critical-use highly engineered plastic products. A primary differentiator of Kaysun as an injection molding company is our engineering expertise that enables us to solve the toughest design and manufacturing challenges. We therefore invest in technology and personnel to grow and build Kaysun into the leading custom contract manufacturing and plastic injection molding firm that serves customers across the globe.
